# PROBLEM STATEMENT :

- Should Company X start with looking at individual employee performance?
- How efficient are SEA processes compared to Europe?
- Automation is low across all processes. Which areas might be quick wins, or alternatively, where long term investment could yield big results?
- Which Vendors can we rely on for expansion? Any outliers who are under or overperforming, and how can we work with them on globalization?
- Are there too many cooks in the kitchen with approval processes? If so, who might be the easiest to “cut” from standard approval processes?

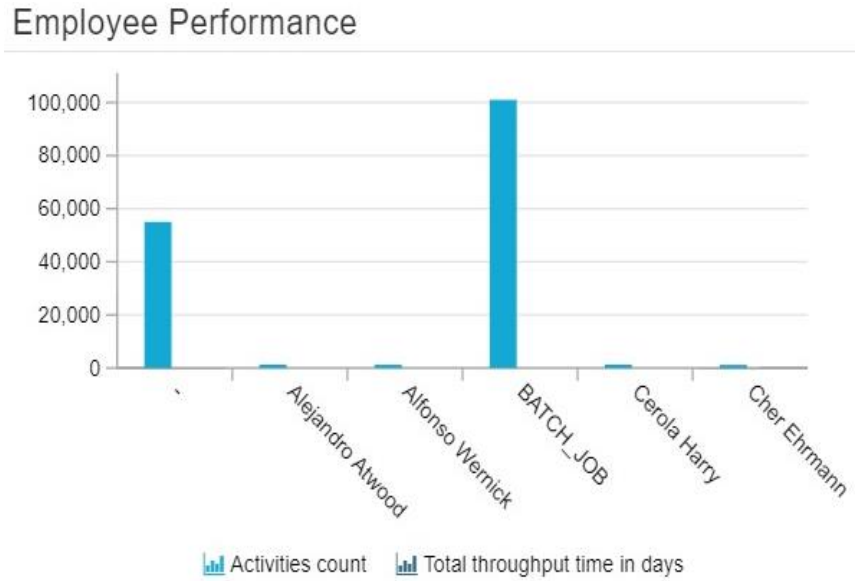

# Q1: Should Company X start with looking at individual employee performance?

Individual Activities

| USER NAME | Activities count |
|---|---|
| - | 55,024 |
| Alejandro Atwood | 1,273 |
| Alfonso Wernick | 1,211 |
| BATCH_JOB | 100,976 |

This employees have completed their activity efficiently within date.

# Q2: How efficient are SEA processes compared to Europe?

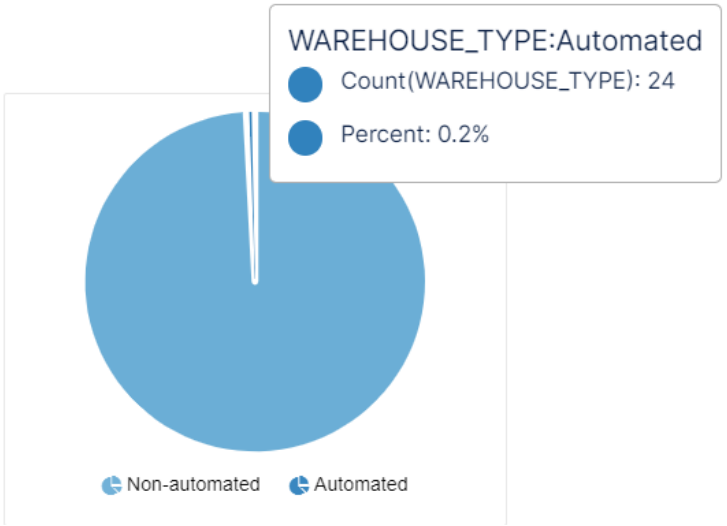

| DELIVERY_COMPANY | CUST_COUNTRY | Sum(ORDER_DATE_MET) |
|---|---|---|
| UPS | DE | 6663 |
| UPS | ES | 569 |
| UPS | FR | 562 |
| UPS | NL | 447 |
| UPS | SE | 332 |

The SEA processes of Company X are not as efficient as their European processes. Company X should consider delivering the products on time for better customer satisfaction in the SEA market. They should also try to deliver the products in the exact quantity for increasing profit.

The SEA countries, such as Thailand (TH), have a low delivered quantity compared to European countries like Germany (DE) and Spain (ES). By improving their delivery efficiency and quantity in SEA countries, Company X can increase their profit and customer satisfaction in those

# Q3: Automation is low across all processes. Which areas might be quick wins, or alternatively, where long term investment could yield big results?

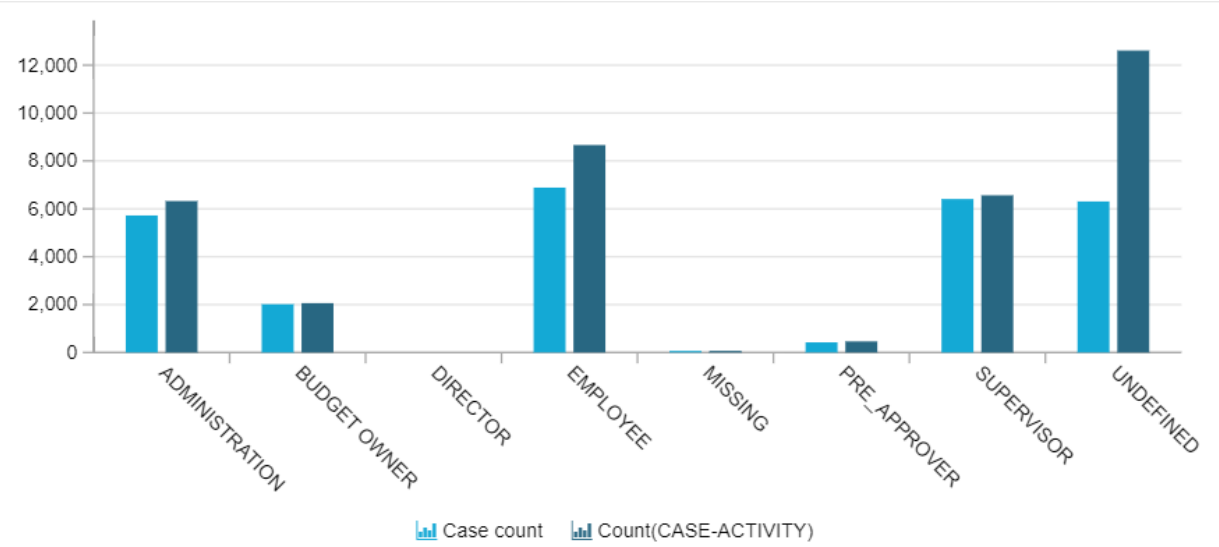

Automation is low across all processes at Company X. They should consider increasing their automation rate for better efficiency and growth, as it significantly helps in saving time and money. By automating aspects such as order processing, route planning, payment processing, and change in delivery dates, Company X can achieve better results and stay competitive in the market.

| DELIVERY_COMPA… | WAREHOUSE_… | ACTIVITY_EN | Count(WAREHOUS… |
|---|---|---|---|
| UPS | Automated | Change production s… | 2 |
| UPS | Automated | Change quantity | 2 |
| UPS | Automated | Check Credit Score | 2 |
| UPS | Automated | Confirm sale | 2 |
| UPS | Automated | Finished production | 2 |
| UPS | Automated | Goods delivered | 2 |
| UPS | Automated | Load shipment | 2 |
| UPS | Automated | Order received | 2 |
| UPS | Automated | Start production | 2 |
| DHL | Non-automated | Change delivery date | 86 |
| FedEx | Non-automated | Change delivery date | 29 |
| UPS | Non-automated | Change delivery date | 487 |
| DHL | Non-automated | Change price | 111 |
| FedEx | Non-automated | Change price | 33 |
| UPS | Non-automated | Change price | 544 |
| DHL | Non-automated | Change production s… | 110 |
| FedEx | Non-automated | Change production s… | 74 |
| UPS | Non-automated | Change production s… | 937 |
| DHL | Non-automated | Change quantity | 94 |
| FedEx | Non-automated | Change quantity | 48 |
| UPS | Non-automated | Change quantity | 795 |

# Q4: Are there too many cooks in the kitchen with approval processes? If so, who might be the easiest to "cut" from standard approval processes?

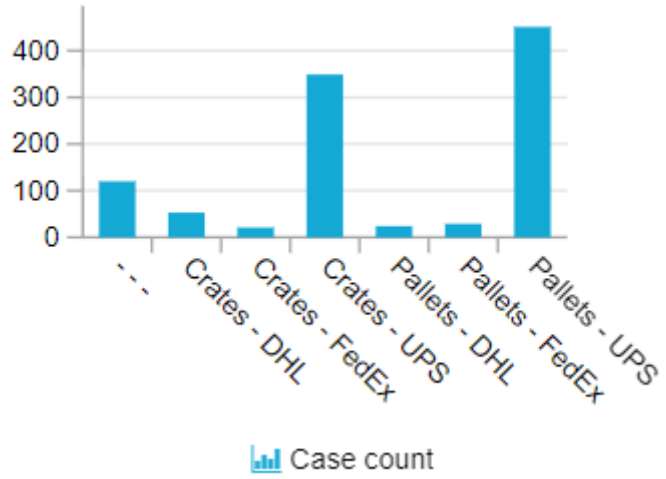

| ORG:ROLE | ORG:RESOURCE | Count(ORG:ROLE) |
|---|---|---|
| ADMINISTRATION | STAFF MEMBER | 6326 |
| BUDGET OWNER | STAFF MEMBER | 2062 |
| DIRECTOR | STAFF MEMBER | 41 |
| EMPLOYEE | STAFF MEMBER | 8663 |
| MISSING | STAFF MEMBER | 66 |
| PRE_APPROVER | STAFF MEMBER | 464 |
| SUPERVISOR | STAFF MEMBER | 6564 |
| UNDEFINED | SYSTEM | 12610 |

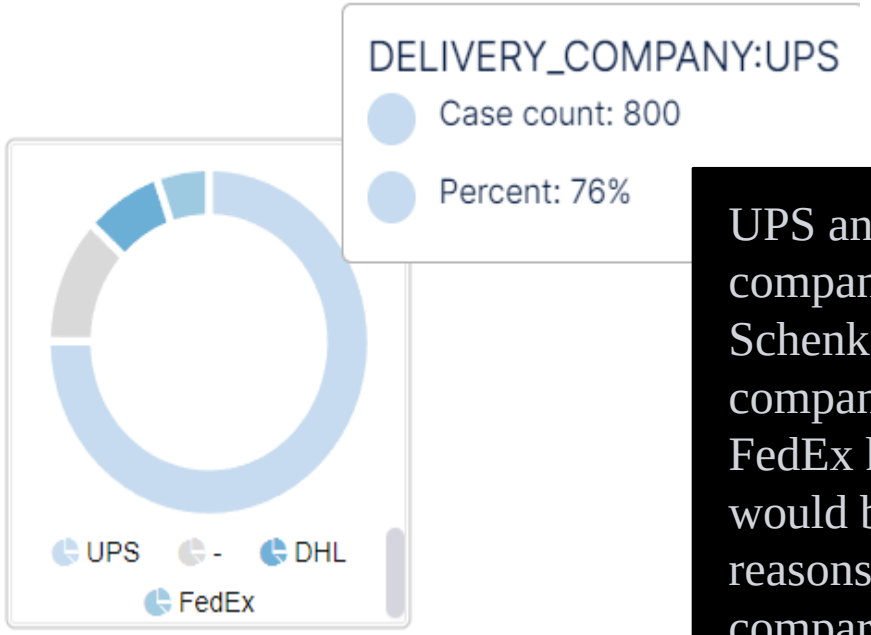

Company X can identify job roles that have less impact and consider cutting them from the process. This could potentially reduce the number of people involved in the approval process and streamline the workflow.

# Q5: Which vendors can we rely on for expansion? Any outliers who are under or overperforming, and how can we work with them on globalization?

| DELIVERY_COMPANY | Count(ORDERED_QUANTITY) | Sum(ORDER_DATE_MET) |
|---|---|---|
| DB Schenker | 5 | 5 |
| DHL | 667 | 352 |
| FedEx | 406 | 347 |
| UPS | 10016 | 9055 |

UPS is the most reliable delivery company for expansion as they have the highest number of order date met and the highest percentage of order date met.

UPS and DHL are reliable delivery companies for expansion, while DB Schenker is an underperforming delivery company that requires improvement. FedEx has room for improvement, and it would be beneficial to investigate the reasons for their lower performance compared to UPS.

# Q6: Company X hopes to grow somewhere between 18-22% YoY. How might the increase in orders, purchasing and travel cut into profits, or increase profits over the next 5 years?

| Year(EVENTTIME) | Sum(UNIT_PRICE) | Activities count | Count(DAYS_TO_DEL_DEADLINE) |
|---|---|---|---|
| 2016 | 1837 | 3 | 3 |
| 2017 | 1604593 | 2,590 | 2438 |
| 2018 | 2741956 | 4,793 | 4129 |
| 2019 | 1768309 | 2,905 | 2702 |
| 2020 | 445424 | 803 | 687 |

- Company X can invest in research and development to create new, innovative, and high-quality products that cater to the specific needs and preferences of their target market.
- Implement a performance management system to track and evaluate employee performance.
- Ensure that delivery product is up to date and meets customer satisfaction requirements.

The company X should consider investing in automation and technology to increase efficiency and reduce costs in areas such as purchasing, logistics, and fulfillment. This could help offset any increased costs associated with growth and ensure that profits continue to grow in line with revenue.

# THANK YOU
